At Nob Hill Water, we're making changes to improve fairness, clarity, and long-term system reliability. Beginning soon, you'll see a **new tiered billing structure**, a **redesigned water bill**, and an **adjustment to the base service charge**.

Base Charge Update

To help cover rising costs of operating and maintaining the water system, the monthly base service charge will increase from **\$20.37 to \$22.00**. This fixed charge helps ensure safe, reliable water service is available at all times, regardless of how much water is used.

What Is Tiered Billing?

Tiered billing means the price per unit of water increases as usage increases. Everyone pays the lowest rate for essential water use, and higher rates apply only to the extra water used above each tier—encouraging conservation.

What's New on Your Bill?

Your updated bill will be easy to read and will clearly show:

- Water use broken into tiers
- Fixed charges and usage charges listed separately
- A simple comparison to previous usage

When Does This Start?

These updates will take effect **April 1, 2026**.
